Designed Test Case:

01. Notifications

FixMyBD specifies notifications for Report Received, Status Updates, Authority Responses and Feedback Requests.

Field	Details
Test Case ID	TC-FMB-NOT-01
Test Scenario	Verify that a citizen receives the appropriate notification when there is an update related to their reported issue.
Preconditions	1. Citizen account is registered and logged in. 2. Citizen has submitted a public issue report. 3. The report exists in the system. 4. An authority can update the report or respond to the citizen.
Test Steps	1. Log in as a citizen. 2. Submit a public issue report. 3. Verify the report is submitted successfully. 4. Allow the authority to update the report status or provide a response. 5. Open the Notifications section as the citizen. 6. Check the notification related to the report.
Input Data	Report Title: Broken Street Light Report Status: Submitted to Acknowledged Authority Response: Response added to the report
Expected Result	The system generates and displays the relevant notification to the citizen for the report/status update/authority response. The notification should correspond to the citizen's submitted report.
Actual Result	To be completed during test execution.
Status	Pass / Fail

Remarks	Validates the notification functionality associated with report submission, status updates and authority responses.

02. Admin Dashboard Management

Field	Details
Test Case ID	TC-FMB-ADM-01
Test Scenario	Verify that an administrator can access the Admin Dashboard and manage users, authorities, categories, locations and reports.
Preconditions	1. An administrator account exists and is active. 2. The administrator is logged in with valid credentials. 3. Users, authorities, categories, locations and reports exist in the system.
Test Steps	1. Log in as an administrator. 2. Navigate to the Admin Dashboard. 3. Verify that management options are displayed. 4. Open User Management and view user records. 5. Open Authority Management and view authority records. 6. Open Category Management and view available categories. 7. Open Location Management and view available locations. 8. Open Report Monitoring and view submitted reports. 9. Open Dashboard & Analytics and view available system statistics.
Input Data	Admin credentials User records Authority records Issue categories Location hierarchy Submitted issue reports

Expected Result	The Admin Dashboard loads successfully and provides access to the specified management functions. The administrator can view users, authorities, categories, locations, submitted reports and available dashboard/analytics information.
Actual Result	To be completed during test execution.
Status	Pass / Fail
Remarks	Validates the main Admin Dashboard and Management functionality defined in the FixMyBD project scope.
