FixMyBD

Report. Track. Improve Bangladesh.

Citizen Public Issue Reporting & Tracking Platform — A centralized platform that helps citizens report public issues, track authority responses, and provide feedback on resolution progress.

The Problem

Current Challenges Facing Citizens

Difficult Reporting

Citizens may not know where or how to report local public issues.

Scattered Complaints

Reports submitted through different channels, difficult to organize and monitor.

Poor Follow-up

Limited visibility into what happens after submitting a report.

No Progress Updates

Citizens don't know if an issue is being reviewed, assessed, or acted upon.

Limited Visibility

Difficult to understand which areas or categories have the most reported issues.

Low Transparency

Status and authority responses are unclear

Our Solution: FixMyBD — One centralized platform to Report • Track • Resolve • Verify public issues

Target Users

👤 Citizens — Primary Users

- Register & Login
- Report public issues
- Add location & evidence
- Track report status
- View authority updates
- Support existing issues
- Provide feedback

🏛️ Authorities / Departments

- View submitted reports
- Review & assess issues
- Provide responses
- Update issue status
- Add progress information
- Upload supporting evidence
- Respond to citizen feedback

⚙️ System Administrator

- Manage users & authorities
- Manage categories & locations
- Monitor reports & moderate content
- View system analytics

Project Objectives

1. **Simplify Public Issue Reporting**
2. **Centralize Issue Information**
3. **Improve Follow-up & Transparency**
4. **Track Authority Responses**
5. **Encourage Citizen Participation**
6. **Generate Useful Insights**

Main Objective: Make public issues **visible**, **trackable**, and **accountable**.

Major Features & Functionalities - Citizen Features

Issue Reporting

- Report a Public Issue
- Title & Description
- Category Selection
- Photo Upload
- Location Selection

Location Hierarchy

- Division → District → Upazila → Union → Ward

Tracking

- My Reports
- Current Status
- Progress Timeline
- Authority Updates
- Report History

Community Participation

- Support / Upvote Issues
- Comments
- Citizen Feedback

Notifications

- Report Received
- Status Updates
- Authority Responses
- Feedback Requests

Authority & Admin Features

Authority Dashboard

- View Reports
- Review Submitted Issues
- Assess / Verify Information
- Respond to Citizens

Admin Dashboard

- User Management
- Authority Management
- Category Management
- Location Management
- Report Monitoring
- Content Moderation
- Dashboard & Analytics
- System Notifications

Authority Status Management

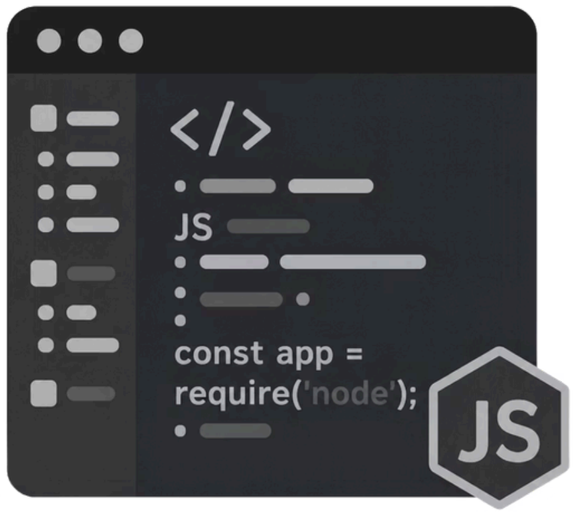

Authorities can update a report through the following workflow:

1. **Submitted**
2. **Acknowledged**
3. **Under Assessment**
4. **Action Planned**
5. **In Progress**
6. **Completed**
7. **Citizen Feedback**

Additional Status Options

⏸️ On Hold	✗ Rejected	↩️ Reopened

Technology Stack

Layer	Technology
Frontend	HTML, CSS, JavaScript
Backend	Node.js
Database	MongoDB
Location / Map	OpenStreetMap
Version Control	Git & GitHub
Development	VS Code

System Workflow

How Does FixMyBD Work?

🧑 Citizen Workflow

Register/ Login

Report Public Issue

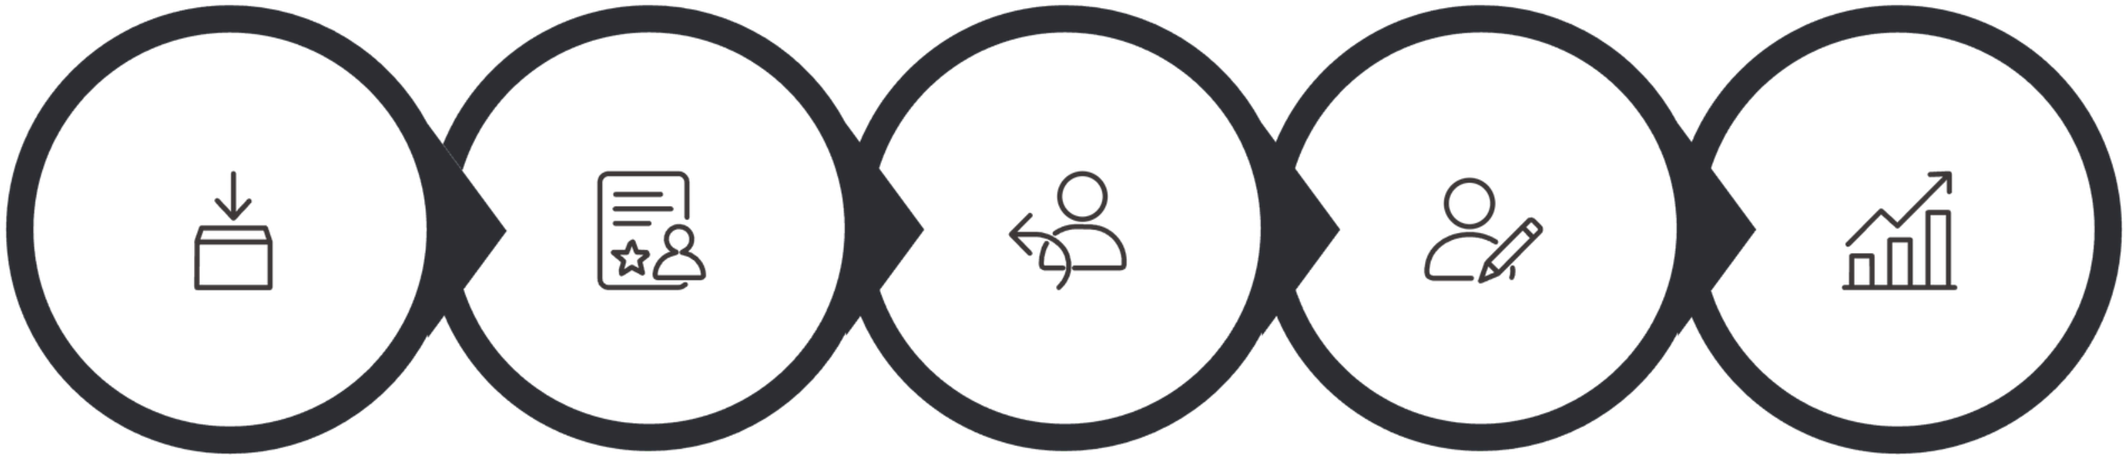

Select Category & Location

Add Description & Photo

Submit Report

Authority Workflow

🏛️ Authority Workflow

Receive Report

Review / Assess

Provide Response

Update Status

Add Progress Info

Citizen Feedback Loop

🔄 Citizen Feedback Loop

Complete Workflow:
REPORT → REVIEW → UPDATE → FEEDBACK. FixMyBD tracks the process; responsible authorities handle the actual public service response.

Uniqueness & Significance

Location-Based

Division → District → Upazila → Union → Ward.

Transparent Tracking

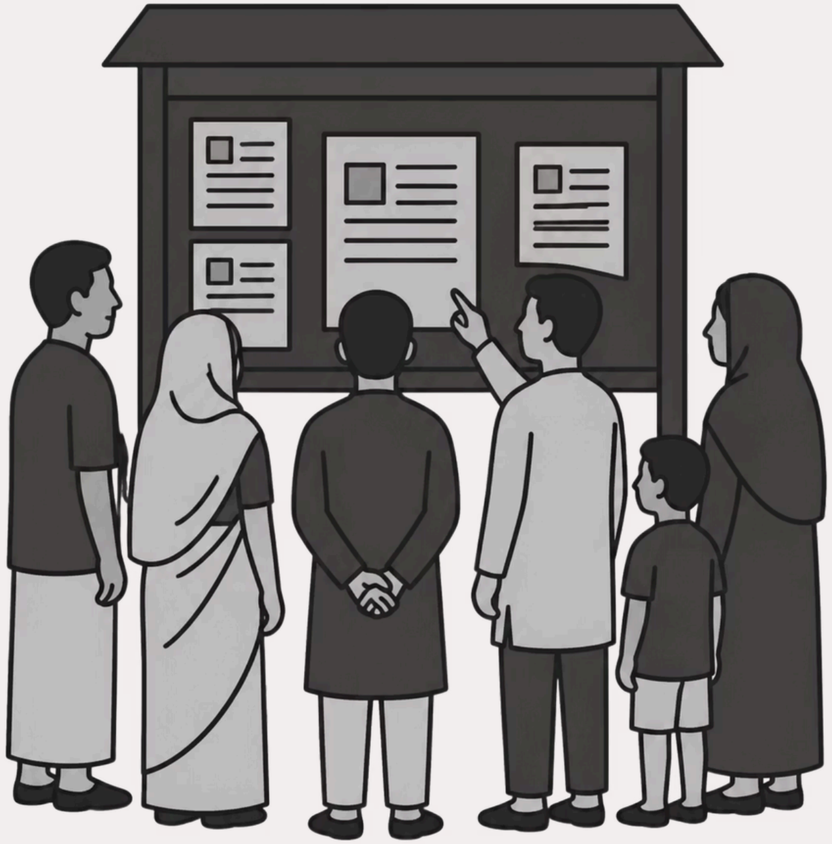

Citizens can follow the full report journey:
Submitted → Reviewed → Updated → Completed.

Community Participation

Users can support, comment, and provide feedback on issues — turning individual complaints into community voices.

Evidence & Insights

Photos, authority updates, citizen feedback, and area-wise statistics improve transparency and accountability.

Feasibility & Project Scope

⚙️ Technical Feasibility

- **Technically Feasible:** HTML, CSS, JavaScript, Node.js & MongoDB can be developed within course duration.
- **Modular Architecture:**

Authentication → Reporting → Authority → Tracking → Feedback → Admin

- **Realistic Prototype:** Academic prototype focused on authority response and progress tracking; not a deployed government system.

🎯 Initial Scope — MVP

- **Citizen Module:** Register/Login, Report Issue, Track Status, Feedback & Support
- **Authority Module:** View & Review Reports, Respond to Issues, Update Status & Progress, Mark Completed
- **Admin Module:** User & Authority Management, Category & Location Management, Report Monitoring, Basic Analytics

Expected Outcome

👤 For Citizens

- Easy public issue reporting
- Clear report tracking
- Better visibility of authority responses
- Community participation opportunities
- Feedback mechanism

🏛️ For Authorities

- Centralized issue records
- Organized report management
- Structured response tracking
- Area/category-based insights
- Better visibility of pending issues

🏘️ For Communities

- More visible local problems
- Increased citizen participation
- Better transparency
- Structured public issue data

FixMyBD will provide a centralized platform where citizens can **REPORT** → authorities can **RESPOND** → citizens can **TRACK** → both sides can **UPDATE & FEEDBACK** → the system can **GENERATE INSIGHTS**.

Questions & Answers
